PROFILE

.NET Backend Developer with 6 years of experience in C#, ASP.NET Core, REST APIs, Microservices, Entity Framework, and SQL Server. Experienced in developing scalable backend solutions, database optimization, and cloud services using AWS. Strong understanding of SOLID, Design Patterns, and Dependency Injection, with hands-on experience using GitHub Copilot and Claude Code for AI-assisted development.

SKILLS

- **Languages & Frameworks:** C#, ASP.NET Core, .NET Core, Entity Framework, LINQ, RESTful API Development, NUnit
- **Database Management:** Microsoft SQL Server
- **Software Design:** SOLID Principles, Dependency Injection (DI), Design Patterns
- **AI Tools & Frameworks:** GitHub Copilot, Claude Code, AI-Assisted Software Development, Prompt Engineering
- **Tools:** Visual Studio, Postman
- **Cloud Technologies:** AWS EC2, AWS Lambda, Amazon DynamoDB, Amazon S3, Amazon CloudWatch

PROFESSIONAL EXPERIENCE

03/2026 – Present

Nagarro

Associate Staff Engineer

- Developed and maintained RESTful APIs using C#, ASP.NET Core, Entity Framework, and LINQ for application business requirements.
- Worked on Microservices-based applications, contributing to service development, API integration, error handling, and troubleshooting.
- Designed backend components using SOLID principles, Dependency Injection, and Design Patterns to build maintainable and scalable solutions.
- Worked with SQL Server for database operations, queries, stored procedures, and data-access implementation using Entity Framework.
- Developed and integrated cloud-based solutions using AWS Lambda, EC2, S3, DynamoDB, and CloudWatch.
- Performed API testing and debugging using Postman, and participated in code reviews, technical discussions, and issue resolution.
- Leveraged GitHub Copilot and Claude Code for AI-assisted coding, refactoring, debugging, test generation, and improving development productivity.

06/2023 – 03/2026
Gurugram

Roinet Solution Pvt Ltd,

Software Developer

- Developed secure RESTful APIs for banking applications using ASP.NET Web API, enabling seamless integration with core banking and digital banking systems.
- Implemented JWT-based authentication and authorization mechanisms to enhance application security and protect sensitive financial data.
- Applied OOP principles and design patterns to build scalable, reusable, and maintainable backend components for transaction processing systems.
- Participated in complete SDLC phases including requirement analysis, development, testing, deployment, and production support for banking domain applications.

- Integrated third-party banking and payment APIs using JSON/XML for secure real-time data exchange and financial transactions.

10/2022 – 05/2023
Gurugram

Cognizant Technology Solutions
Programmer Analyst

- Performed debugging and troubleshooting of banking applications to resolve production issues, improve system stability, and ensure uninterrupted financial transaction processing.
- Assisted in developing and enhancing secure Web APIs and microservices for mobile and internet banking applications.
- Prepared technical documentation, API specifications, and support documents for banking systems to facilitate future maintenance and knowledge transfer.
- Supported production deployments and release management activities, including monitoring, rollback handling, and post-deployment validation for banking applications.
- Optimized backend processes and database queries to improve application scalability, transaction performance, reliability, and overall system efficiency in high-volume banking environments.

07/2020 – 09/2022
Gurugram

Genx Info Technologies Pvt. Ltd
Jr. Software Engineer

- Implemented .NET solutions leveraging C#, ASP .NET, HTML, JavaScript technologies.
- Set up IIS server for web application hosting.
- Engaged in entire SDLC phases such as analysis, design, coding, testing, deployement.
